Indiana Nut Nursery

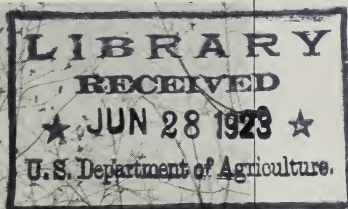

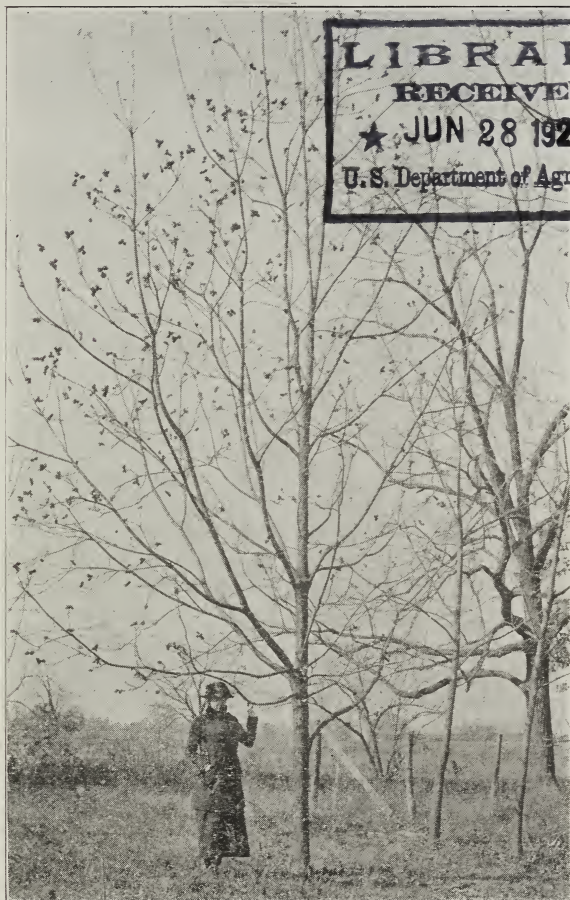

J. F. WILKINSON, Prop.

Rockport

-

-

Indiana

Seven year old budded GREENRIVER pecan tree that produced 14 pounds of pecans in fall of 1922 in INDIANA NUT NURSERY, at a low price of fifty cents per pound for these nuts and twenty trees per acre would be an income of \$140.00 per acre with increasing crops as the trees increase in size.

TO CUSTOMERS AND FRIENDS

Just to remind you that the INDIANA NUT NUR- and this spring has a choice lot to offer for your selection.

That my trees have given satisfaction is evidenced by the many testimonials received from my customers.

My young budded trees growing here have proven their quality by their early bearing.

My nursery is located in the heart of the Northern pecan tree territory, in a soil especially adapted to growing nut trees where they grow an unusually fine root system, making them easy to transplant and quick to start growth.

Nut trees are the longest lived of all food producing trees, and once established require less care and attention than fruit trees, as they do not have to be sprayed and after the head of the tree is once formed little or no pruning is necessary.

Budded or grafted trees bear early. An orchard of them should in a few years come into profitable bearing, and will last a century or more, they also bear true to type or variety. Plant only budded or grafted trees.

My trees are budded or grafted from bearing trees and I know them to be true to label.

The demand for nuts is annually increasing and the price advancing, which makes nut culture very profitable.

Before placing your order for nut trees be sure you are buying from a reliable nurseryman who will send you only budded or grafted trees of Hardy Northern varieties.

Almost everyone owning land has more or less

vacant space that could be made profitable by planting to nut trees.

To what can you devote the same amount of space with the same cost, and with as little care and expense afterward, that will be as permanent and profitable as a nut tree?

TERMS, Cash with order

PRICES, Pecan trees budded or grafted

	Each
2-3 feet - -	\$1.50
3-4 feet - -	1.75
4-5 feet - -	2.00
5-6 feet - -	2.25
6-8 feet - -	2.50
